Ancient Wonders of the Nile

Tour overview

Despite being adjacent to two large bodies of water – the Red Sea and the Mediterranean – Egypt is almost entirely desert, with the exception of areas along the Nile, the world's longest river. Cairo, the country's capital with a population of over 22 million, has a fascinating history and was originally settled by the Fatimids, an Islamic sect, in 973 CE. Its name means "the triumphant city". Of course, history predates this, with the famous pyramids built between 4,000 and 5,000 years ago.

Egypt has numerous archaeological sites of major significance, including the Valley of the Kings, the resting place of the kingdom's pharaohs. The Pyramids of Giza need little introduction, as they sit on the outskirts of Cairo. They are burial grounds for generations of pharaohs. Luxor Temple is a large complex located on the east bank of the Nile River in the city today known as Luxor, and was constructed approximately 1400 BCE. The list goes on! The country is highly indigenous in that 98% of all people, around 110 million, are original Egyptians, with the vast majority being Sunni Muslims. Arabic forms the primary language; however, literacy is very low compared to the developed world.

Blue Dot is offering a tour of this fascinating region, comprising mainly a cruise on the Luxury MS Darakum, with some quality land components. Over 13 days, you'll experience the very best that the country has to offer.

We also offer an optional extension to Abu Simbel, a historic site comprising two massive rock-cut temples near the border with Sudan.

MS Darakum is the only five-star super deluxe Nile cruise operating the long cruise program – Aswan – Cairo. It offers an unforgettable journey as you cruise through 7,000 years of history. Special Moroccan-inspired design with 3 Sundeck levels, cabins with two colour themes and large panoramic windows. The Mövenpick MS Darakum enjoys a private dock in Luxor. She has fewer than 50 spacious, uniquely designed cabins and suites, each with a private bathroom, air conditioning, a bathtub, a minibar, a hair dryer, a Smart TV with Marine Satellite, free Wi-Fi, and a water purification system. All meals – breakfast, lunch, and dinner are provided.

This engineering marvel is crucial in controlling the Nile's annual flooding, providing hydroelectric power, and facilitating agricultural development. Afterwards, you'll enjoy a short motorboat ride to visit the majestic Philae Temple on the Island of Agilka. The entire temple was flooded when the High Dam was built and was moved stone by stone to a new island, specially landscaped to resemble the old. It features artefacts from various periods, including statues, pottery, and jewellery, showcasing the region's ancient civilisations and their interactions with others. Built during the Graeco-Roman Period (332 BC–395 AD) on an older New Kingdom site, the temple features two parallel passages leading to sanctuaries for each deity.
